Office Action Summary	Application No. 10/822,036	Applicant(s) ZHA ET AL. 
	Examiner Joseph W. Drodge	Art Unit 1723

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1723

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-36 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent 6,524,481 and also over claims 1-29 of U.S. Patent No. 6,641,733. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the instant claims are somewhat broader than the claims of either '481 or '733, the instant and patented claims all commonly recite the combination of a system comprising membrane module, junction, hollow fiber membranes, gas and liquid sources, upper and lower potting heads, cavity and bundled arrangement.

ALLOWABLE SUBJECT MATTER

The following is an examiner's statement of reasons for allowance: ***.

Claims 1-29 distinguish over all of the prior art of record, pending resolution of double patenting issues.

Art Unit: 1723

Independent claim 1 , and claims dependent therefrom, distinguish in view of the limitation "the junction is configured to inject a liquid flow having entrained therein a plurality of gas bubbles into a cavity below the lower potting head". The closest prior art, constituting Pederson et al patent 5,944,997; Mahendran et al patents 5,910,250 and 5,639,373; Zha et al patent 6,156,001 and Cote et al patent 5,607,593 cumulatively teach the claimed hollow fiber membrane bundles extending between upper and lower potting heads and use of liquid and gas sources for maintaining the membrane surfaces free of particles and fouling and also mixing of flows of liquid and gas for forward flushing or backflushing of membrane surfaces and also separate flows of gas along membrane surfaces during filtering operation to maintain surfaces relatively free of fouling; however do not teach entraining of gas bubbles via a junction into a cavity below the potting heads.
